- **Web portfolio:** <https://miloslbr.github.io/>
- **GitHub:** <https://github.com/MilosLbr>

After writing the first functional web app, I got hooked to programming and never stopped learning since. The satisfaction I get when the app is doing what I intended it to do keeps me enthusiastic to work, learn and experiment more.

**Languages**

C# (ASP.NET)  
JavaScript, TypeScript  
HTML, CSS, SCSS  
MSSQL

**Frameworks**

Entity framework  
Angular, React, Redux  
jQuery  
Bootstrap

**Other**

Webpack  
Git  
Ajax  
npm, yarn

**# Personal projects/Experience**

<b>My Wallet – Finance tracker</b>  °Live	<b>Movie database web app</b>  °Live
<p>This web app is used for managing and tracking personal finances and budget. The backend is built using <b>ASP.NET WebApi</b> and the frontend is built with <b>Angular</b> framework. <b>JSON web tokens</b> are used to authorize web requests.</p> <p><b>stack:</b> ASP.NET WebApi, Entity framework, Angular, MSSQL, Bootstrap.</p>	<p>This is a web app that uses a database populated with about 250 movies. <b>ASP.NET MVC</b> pattern is used for development. The user first needs to login to get complete access to the website. Search movies, like, comment, add to watchlist are implemented for all users, while update and delete operations are reserved for certain roles.</p> <p><b>stack:</b> ASP.NET MVC, jQuery, Ajax, MSSQL.</p>
<b>Important Serbian localities</b>  °Live	<b>Blackjack game</b>  °Live
<p>This app uses some backend with Python. It gives user the ability to search for Serbian cultural monuments and display their location, additional info and route to the monument on the map.</p> <p><b>stack:</b> React, Ajax, Bootstrap, Python-flask, SQLite</p>	<p>Based on classical casino game, the whole game logic was developed from scratch using <b>React.js</b> and <b>Redux</b>.</p> <p><b>stack:</b> React, Redux, ES6, SCSS, HTML, Webpack.</p>
